

# Did You Know?

If you think you know  
Mid-Columbia Medical Center,  
think again as we redefine  
health care in the Gorge  
in the 21st century.

- Mid-Columbia Medical Center was the **first hospital in the nation** to integrate the Planetree philosophy of person-centered care throughout the entire organization, emphasizing the need to address a person's intellectual, environmental, emotional, social and spiritual concerns in addition to physical needs.
- MCMC is the only American College of Radiology-designated **lung cancer screening** center in the Gorge.
- The family medicine, internal medicine and pediatric programs at MCMC have been **awarded five stars**, the highest designation in Oregon's Patient-Centered Primary Care Home program.
- We offer a **telemedicine** program so patients can visit with an MCMC provider via smartphone, desktop computer or telephone, a convenient way to resolve some medical conditions without having to leave your home.
- Our **Patient and Family Advisory Council** brings together members of the community with our health care team to discuss ways we can enhance the patient and family experience at MCMC.
- We believe that **diversity, equity and inclusion** principles drive thoughtful, innovative solutions to patient-care issues.
